Franklin Electric’s knowledgeable team can help you leverage our diverse product line of pumps and systems to focus on pumping in large, non-pressurized, man-made or natural, open bodied water sources, including the following:

- Lakes
- Ponds
- Rivers
- Creeks
- Water Gardens
- Water Features
- Cisterns
- Aerobic Aeration
- Wet Wells
- Dry Hydrants

EXPERIENCE FRANKLIN

LAKE AND POND MANAGEMENT APPLICATIONS

Water is utilized in many ways to accent and/or provide utility for properties and neighborhoods. The management of water is complex, whether you’re maintaining the grounds of a major country club golf course, a large waterpark, agricultural ponds, municipal run-off retention basins, or even your own private backyard stream. Generally, the design and build of these applications meet specific purposes ranging from water clarity, circulation, aeration, mixing, or aesthetics. Franklin Electric’s products are engineered to meet your specific water challenges, allowing you to keep your focus elsewhere.

SURFACE PUMPS
Franklin Electric offers a wide range of surface pumps cover a wide variety of configurations and applications from small residential jobs to large industrial and agricultural applications.

PRODUCTS
- Jet Pumps
- Self-Priming Pumps
- Centrifugal Pumps
- Multi-Stage Pumps
- Booster Pumps
- Transfer Pumps
- Gas-Engine Drive Pumps
- Magnetic Drive Pumps

SUBMERSIBLE PUMPS
Franklin Electric offers a wide array of submersible pumps designed for the movement of water. These submersible pumps feature proven components and provide superior performance.

PRODUCTS
- 4” High-Capacity Pumps
- 6” AMO Submersible radial Pumps
- 6” and 8” Series Submersible Turbine Pumps
- 9”, 12”, 20”, 40” Series Submersible Turbine Pumps
- Non-Discharge Pumps
- Motor Boat Pumps
- In-Line Pumps

MOTORS & CONTROLS
Franklin Electric offers a complete line of submersible motors for open water and other submersible pumping applications. Franklin Electric also offers single-drive controls which are an integral part of a submersible motor power system.

PRODUCTS
- Control Boxes
- 4" Submersible Motors
- 6" Submersible Motors
- 9” Submersible Motors
- 12” Submersible Motors
- 18” Submersible Motors
- 24” Submersible Motors
- 30” Submersible Motors

PACKAGED SYSTEMS
Franklin Electric’s packaged systems offer increased value and convenience by combining motor, pump, and control, all in one package.

PRODUCTS
- Variable Frequency Drives
  - P-Series
  - SubDrive Connect
  - SubDrive Utility
- Protection
  - Pumptec and Pumptec-Plus
  - SubMonitor Connect
- Control Panel/Pump Starter
  - SubMonitor Connect Starter
  - SmartDRY Pump Starter
  - Standard Pump Starter
- Soft Starters
  - Standard Pump Soft Starter
  - Economizer Pump Starter

DRIVES & PROTECTION
Designed for large or small applications, Franklin Electric offers innovative variable frequency drive and motor protection solutions that require minimal adjustments for simple installation and operation. From providing extended pressure to moving massive volumes of water, trust Franklin for your residential, agricultural, commercial, and municipal water pumping system needs.

PRODUCTS
- Variable Frequency Drives
- Control Panel/Pump Starter
- Soft Starters

SOLAR
Using Franklin Electric’s quality components and innovative thinking we have “harnessed the power of the sun” to provide a clean energy way of moving and pumping water.

PRODUCTS
- SolarDrive SolarPAK
- ProDrive™ SolarPAK
- ProDrive™ Hybrid SolarPAK
