Designed for large or small applications, Franklin Electric offers innovative drive and control solutions that require minimal adjustments for simple installation and operation. From providing constant pressure for residential well systems to moving mass volumes of water, Franklin Electric has the right products, parts, and services for your residential, agricultural, commercial, and municipal water pumping system needs.

**SUBMERSIBLE PUMPS & VERTICAL LINESHAFT TURBINES**

Franklin Electric offers a wide array of submersible pumps and vertical lineshaft turbines designed for the movement of water. Our water pumping solutions feature proven components and provide superior performance.

**Products**
- 4” High Capacity Pumps
- 4” and 6” Submersible Axial Pumps
- 4” SRA Series Submersible Axial Pumps
- 4”, 5”, 6”, and 8” USS Submersible Turbine Pumps
- 4”, 5”, and 6” USS Vertical Linehaft Turbine Pumps
- 6”, 10” USS Submersible Turbine Pumps
- 6” - 12” PCS Submersible Axial Pumps
- 6” - 42” PCS Vertical Lineshaft Turbine Pumps
- 6” - 12” Series Axial Flow Vertical Turbine Pumps
- 6” - 12” Series Mixed Flow Vertical Turbine Pumps

**SURFACE PUMPS**

Franklin Electric’s line of surface pumps cover a wide range of configurations and applications, from small residential jobs to large industrial and agricultural applications.

**Products**
- Self-Priming Pumps
- Centrifugal Pumps
- Multi-Stage Pumps
- Gas Engine Pumps

**MOTORS & CONTROLS**

Franklin Electric offers a complete line of submersible motors and pump drivers for agricultural pumping applications. Franklin Electric also offers single-phase controls, which are an integral part of a submersible motor power system.

**Products**
- Control Boxes
- 4”, 5”, 6”, 8”, and 10” Submersible Motors
- MagForce™ High Efficiency Motor System
- Vertical Axial Flow Motors

**DRIVES & PROTECTION**

Designed for large or small applications, Franklin Electric offers innovative drive and control solutions that require minimal adjustments for simple installation and operation. From providing constant pressure for residential well systems to moving mass volumes of water, Franklin Electric has the right products, parts, and services for your residential, agricultural, commercial, and municipal water pumping system needs.

**Variable Frequency Drives**
- Forward
- SubDrive Connect
- SubDrive Connect Plus (optional service 02H)

**Protection**
- Pressure and Pump Failure
- Submonitor Connect

**PACKAGED SYSTEMS**

Franklin Electric’s packaged systems offer increased value and convenience by combining motor, pump, and control, all in one package.

**Products**
- SubDrive QuickPAK
- SolarPAKs (see below)

**SOLAR**

Using Franklin Electric’s quality components and innovative thinking, we have “harnessed the power of the sun” to provide a clean energy method of moving and pumping water.

**Products**
- Product™ SolarPAK, 1/2 - 10 hp
- Product™ SolarPAK, 10/10 hp
- SubDrive SolarPAK, 0.75 - 5 hp

**IRRIGATION**

Using on Mother Nature to irrigate crops and pastures on your land requires precision and patience. Franklin Electric’s agricultural pumping systems provide stability to increase output, better predict crop yields and keep your livestock strong and hydrated.
